Professional Summary

Computer Science undergraduate specialising in AI & ML with hands-on experience building full-stack applications, REST APIs, and end-to-end machine learning pipelines. Adept at delivering computer vision and NLP-driven solutions using Python, React.js, and FastAPI, with a focus on optimising model accuracy, scalable inference, and real-world deployment.

Education

B.Tech in Computer Science and Engineering (AIML) 2023 - Present
University of Petroleum and Energy Studies, Dehradun
12th, ICSE, St. George's College, Agra May 2023

Technical Skills

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript
AI/Machine Learning: MobileNetV2, TensorFlow/Keras, Neural networks, Scikit-learn, OpenCV, NLP, Pandas
Web & Backend: React.js, FastAPI, Flask, Spring Boot, Microservices Architecture, REST APIs
Tools & Databases: Git, Docker, MySQL, MongoDB, Firebase, Linux

Internships

AI & ML Project Intern - Empyrean Consultancy Services Pvt Ltd Jun 2026 - Present

- Designing and developing ML models for AI-powered object readiness detection and automated dataset pipelines.
- Building and testing computer vision inference software in an Agile environment, optimising model accuracy and performance.

Tech & Social Media Intern - Binary Keeda Education Pvt. Ltd. Jun 2025 - Aug 2025

- Drove social media strategy achieving a 50% increase in audience engagement within two months.
- Maintained backend technical documentation and co-produced podcast scripts with the engineering team.

Projects

BananaSense AI - Computer Vision Ripeness Detection Featured Project

Tech Stack: Python, MobileNetV2, FastAPI, React.js, OpenCV

- Built a deep learning image classifier using MobileNetV2 (CNN) and transfer learning for multi-class banana ripeness detection.
- Developed a FastAPI backend and a React.js frontend with real-time prediction output and analytics dashboard.

ChronoClima - Hyper-Local Weather & Climate Risk App NASA Grand Finalist

Tech Stack: React, TypeScript, FastAPI, OpenWeatherMap API, ESP8266

- Designed the Adverse Condition Impact Score (ACIS), a personalized weather risk metric for event scheduling.
- Integrated IoT gateway for location input and built an AI weather chatbot with an animated forecast UI.

IDEACT - Intelligent SDG-Oriented Hackathon Advisor 2025

Tech Stack: Python, FastAPI, React.js, MongoDB, NLP

- Built an AI platform mapping hackathon statements across 17 UN SDGs using an NLP tokenization pipeline.
- Architected a 3-layer system outputting feasibility-scored project ideas and week-by-week execution plans.

KASA - AI-Powered Laser QR Marking System SIH Grand Finalist

Tech Stack: React, Raspberry Pi, Edge TPU, Firebase, Python

- Served as Software Lead, building an analytics dashboard with failure-rate visualizations for field engineers.
- Architected a cloud backend synchronizing directly with Indian Railways' UDM and TMS portals.

Certifications

- AWS Foundations of Prompt Engineering - Amazon Web Services (Jun 2026)
- SQL and Relational Databases 101 - IBM Skills Network (Jun 2026)
- Career Essentials in Generative AI - Microsoft & LinkedIn Learning (Jun 2026)
- Data Analytics Job Simulation - Deloitte (Jun 2026)

Leadership & Achievements

- Grand Finalist - NASA Space Apps Challenge 2025 & Smart India Hackathon 2025.
- Secured Alpha Batch at UPES - top programming tier based on DSA proficiency.
- Associate Secretary (Avishkarnam Literary Club) & Organizer at Ukti, Uurja, and Spandan - major university fests at UPES.
